Pallet Handling

Improve storage density and ergonomics with less bending and straining

- Convert static pallet positions to dynamic
- Keep products at the point of pick
- All steel construction for maximum durability
- Maximize storage density by eliminating the need for entry clearance

pallet//track

High-Density Storage

Dynamic high-density storage for faster each picks

- Increase storage density up to 60%
- Reduce labor costs up to 40%
- Cell capacity of 35lbs., column capacity of 240lbs.
- Working temperature of -20°-180°
- Built-in label holders
- 5-year warranty

speed//cell

Case Picking

Innovative carton flow solutions that drop into existing racking

- Engineered to order for specific applications
- Increase throughput up to 150%
- First-In-First-Out stock rotation
- Handles up to 100 lbs per foot
- Available in dedicated roller lanes or universal wheel beds
